Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 249, *Traditional Chinese medicine*.

Traditional Chinese medicine — Infection control for acupuncture treatment

1 Scope

This document specifies aspects to be considered for infection control for acupuncture treatment. Clinical practice in acupuncture treatment is outside the scope of this document.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>

3.1

infection

invasion of bodily tissue by pathogenic microorganisms that proliferate, resulting in tissue injury that can progress to disease

3.2

infection control

policies and procedures used to minimize the risk of spreading infections

3.3

sterilization

validated process used to render product free from viable microorganisms

[SOURCE: ISO/TS 11139:2006, 2.47, modified]

3.4

disinfection

removal of all pathogenic microorganisms, except spores of germs on the surface of inanimate objects

[SOURCE: ISO 13408-1:2008, 3.18, modified]

3.5

germicide

agent that kills microorganisms

[SOURCE: ISO 13958:2014, 3.21]

3.6

acupuncture

insertion of needles into humans or animals for remedial purposes or its methods

[SOURCE: WHO International Standard Terminologies on Traditional Medicine in the Western Pacific Region, 5.1.0]
